BEDIAM Diamantwerkzeuge & Oberflächentechnik GmbH

About us

(27.08.2007)

BEDIAM Diamantwerkzeuge & Oberflächentechnik GmbH goes east. The managing director of BEDIAM in Berlin, Doreen Hehlert, decided to come to the BIG 5 Show in Dubai this year. Doreen told me, that this decision was based on the frequently inquiries of the gulf countries in the past year.

Further Doreen explained to me, that BEDIAM Diamantwerkzeuge & Oberflächentechnik GmbH, one of the leading brands and manufacturer of floor grinding machines, diamond tools and equipment for grinding, polishing, maintaining and protecting stonefloors and concrete, is looking for general agents in different arabic countries during the BIG 5 show this year.

BEDIAM develops restoration systems, care solutions and maintenance products for floors made by marble, granite, terrazzo, natural stones, engineered stones and concrete. This are product ranges are required in the hotel and touristim businesses, as well as in the establishing and maintaining of natural stone floors.

The PRO+XTREME system based on a strong hardener and densifier for concrete floors is the unique solution in the market for all kinds of industrial sites. Long lasting, strong surfaces and cost-effective in preparing and maintaining concrete floors. The PRO+XTREME system is shared in 3 solutions for new and existing concrete floors. The first one is the PRO+XTREME Chemische Betonverdichtung, an easy solution that the concrete floor will make hardened, densified and protected by a single application of the PRO+XTREME material. The second one is built-on the first. After the full application process, the concrete floor will look like a natural stone floor with high shine. The third solution is an artistic design of the concrete floor with color, labels, brands and different kinds of aggregate. Looks like terrazzo floors, but last very long and strong.

Consequently the focuses of the BEDIAM Diamantwerkzeuge & Oberflächentechnik are high performances, prompt services and perfect grinding and polishing results. The product range of the BEDIAM leaves nothings to desire. All developed floor solutions are based on customer demands.

BEDIAM manufactures and sells a complete range of machines, tools, chemicals and further products for stone floor establishing, restorations, care, grinding, polishing and protection.

Finally Doreen told me, BEDIAM will present on the booth in

the BIG 5 show solutions for marble, granite and natural stone floors and the PRO+XTREME system for industrial sites and designer floors made by cementary floor systems.

“We are glad and optimistic to come to the great BIG 5 Show in Dubai this year and we are prepared to achieve the expectations of our visitors.” said Doreen in the end.
